Description			
Added i18n var to the bug solved at r2542 reported by me at issue #2866 .			
I added the en and pt_BR (my language), should I add to others too ?			
Is there some helper script to see i18n var not used/added between english and some other ?

- File 0002-Used-rake-locales-update-to-add-the-new-i18n-vars.patch added

Another patch to complement the first one.

I used rake locales:update to add the new vars in the other language files.

The message is still hardcoded in [source:trunk/app/controllers/issues_controller.rb#L134](#) and [source:trunk/app/controllers/issues_controller.rb#L145](#)

If I could change this ticket category, maybe it would be easier for the responsible to find it.

I have this in my "messy" github redmine fork (<http://github.com/enderson/redmine>) , in sync with edavis10 last commit.
