

Redmine - Defect #29418

User cannot set version sharing to hierarchy or tree

2018-08-21 22:25 - Gustavo Regal

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Roadmap	Estimated time:	0.00 hour
Target version:			
Resolution:		Affected version:	3.4.6
Description			
<p>I have a role that has the Manage versions permission. It is called "Analista/desenvolvedor".</p> <p>Then I have a project in which a user is assigned to the role "Analista/desenvolvedor". And a subproject with the @Inherit members" option checked.</p> <p>When that user tries to create a new Version, the only possible values in Sharing are "None" and "Subprojects".</p> <p>Then I have another project with similar configuration in which the user <u>can</u> set any value to the Sharing option.</p> <p>I'm considering this to be a defect because didn't find anything in the docs but the permission Manage versions in roles configuration. Believe other aspects should not interfere.</p>			
Environment:			
Redmine version	3.4.6.stable		
Ruby version	2.3.7-p456 (2018-03-28) [x86_64-linux]		
Rails version	4.2.8		
Environment	production		
Database adapter	Mysql2
