

Redmine - Defect #29418

User cannot set version sharing to hierarchy or tree

2018-08-21 22:25 - Gustavo Regal

Status:	New	Start date:											
Priority:	Normal	Due date:											
Assignee:		% Done:	0%										
Category:	Roadmap	Estimated time:	0.00 hour										
Target version:		Affected version:	3.4.6										
Resolution:													
Description													
<p>I have a role that has the Manage versions permission. It is called "Analista/desenvolvedor".</p> <p>Then I have a project in which a user is assigned to the role "Analista/desenvolvedor". And a subproject with the "@Inherit members" option checked.</p> <p>When that user tries to create a new Version, the only possible values in Sharing are "None" and "Subprojects".</p> <p>Then I have another project with similar configuration in which the user <u>can</u> set any value to the Sharing option.</p> <p>I'm considering this to be a defect because didn't find anything in the docs but the permission Manage versions in roles configuration. Believe other aspects should not interfere.</p> <p>Environment:</p> <table><tr><td>Redmine version</td><td>3.4.6.stable</td></tr><tr><td>Ruby version</td><td>2.3.7-p456 (2018-03-28) [x86_64-linux]</td></tr><tr><td>Rails version</td><td>4.2.8</td></tr><tr><td>Environment</td><td>production</td></tr><tr><td>Database adapter</td><td>Mysql2</td></tr></table>				Redmine version	3.4.6.stable	Ruby version	2.3.7-p456 (2018-03-28) [x86_64-linux]	Rails version	4.2.8	Environment	production	Database adapter	Mysql2
