

## Redmine - Patch #29614

### redmine:email:read and rdm-mailhandler.rb should use safe\_receive instead of receive

2018-09-15 07:05 - Go MAEDA

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Jean-Philippe Lang	<b>% Done:</b>	0%
<b>Category:</b>	Email receiving	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	4.0.0		
<b>Description</b>			
<p>Since r12995, rake redmine:email:receive_imap and rake redmine:email:receive_pop3 use MailHandler.safe_receive instead of receive to handle exceptions which raised while processing broken email. However, rake redmine:email:read and MailHandlerController#index (invoked from rdm-mailhandler.rb) still uses receive method, not safe_receive method.</p> <p>I think rake redmine:email:read and MailHandlerController#index should also use safe_receive method instead of receive method to handle exceptions in a same way with receive_imap and receive_pop3.</p>
