<b>Description</b> I have 50k+ users.  Whenever I open project settings screen ruby chokes (I assume this is because of the high user count). Further more, when I head to members screen, the dropdown with 50k+ users kills my browser.  I have learned to manage users through administration->Users->[pick user]->Project, and then add the person to a project. But this is something that only administrator can do, not a project manager.  Instead of a drop down could it be a search screen? Kind like we already have under administration->users ?  Thank you

Revision 2638 - 2009-03-28 13:07 - Jean-Philippe Lang

Adds a user search field with autocompleter on project members screen.  
User selection with checkboxes is disabled if there are more than 300 users available (#2993).

- Status changed from New to Closed
- Target version set to 0.9.0
- Resolution set to Fixed

[r2638](#) fixes that problem. You now have a user search field with autocompleter.

- % Done changed from 0 to 100

Thank you,

This is exactly what I needed.

Kind regards

woah! just wondering, if you dont mind my asking, how did your redmine site end up with 50k+ members?

**#5 - 2010-02-19 17:23 - Zarooba Rozruba**

Company I work with has that many people listed in LDAP. This includes people that are not employed directly, but also through contract work. Not all of them actually use Redmine, but all their accounts needed to be created so that they can be assigned to projects without having logged into Redmine first.

Additional stats:

- almost 200 projects
- 40k various project commits
- 7k issues

Unfortunately only a small fraction of the company actually uses Redmine, and not yet in full capability. Documentation stays in Sharepoint, wiki underused, not all projects hook up repository, some groups will use TFS/Mantis/SharePoint/RequistePro/Bugzilla/Remedy.

Currently Redmine has replaced 5 bug tracking systems used by various teams within the IT (two of which internally developed).
