Description

In some use-case scenarios, like code merge, users don't want any actions taken, after a particular keyword, except referencing code to an issue.

Here is sample scenario:
[[https://stackoverflow.com/questions/53414866/redmine-referencing-keywords-in-case-of-merge]]

So probably there should be ability to configure repository message parser via settings to completley ignore commit message, or just to ignore actions after particular keyword in commit message.

Sample for settings can look like this:
