

Redmine - Defect #3004

Field lock version lacks translation

2009-03-18 17:46 - Brad Beattie

Status:	Closed	Start date:	2009-03-18
Priority:	Normal	Due date:	
Assignee:	Eric Davis	% Done:	100%
Category:	Issues	Estimated time:	0.00 hour
Target version:	0.9.0	Affected version:	
Resolution:	Fixed		
Description			
When two people edit the same issue at the same time, I get the following message appended to the issue's changes: translation missing: en, field_lock_version Truthfully, I don't think this message should even display. I find my users ask me things like "It changed from 7 to 6, but I have <i>no</i> idea what that means".

Revision 2644 - 2009-04-02 19:28 - Jean-Philippe Lang

Make sure that lock_version changes are not stored in journals table (#3004).

History

#1 - 2009-03-19 06:25 - Eric Davis

- Category changed from *Translations* to *Issues*
- Status changed from *New* to *7*
- Assignee set to *Eric Davis*

I saw this message come up also on a recent deployment. You are right, that field should be ignored. I have some tweaks to the issue conflicts that I'm working on, I'll check this issue out at the same time ([#2621](#)).

#2 - 2009-03-25 18:44 - Jean-Philippe Lang

Can you attach the html snippet that displays this text?

```
<ul>
  <li><strong>translation missing: en, field_lock_version</strong> changed from <i>1</i> to <i>0</i></li>
</ul>
```

#4 - 2009-04-02 19:29 - Jean-Philippe Lang

- Status changed from *7* to *Resolved*

This should definitely not appear at all. I've committed a fix in [r2644](#) that should prevent these changes from being stored in the journals table. And you should be able to remove these changes from your database with:

```
delete from journal_details where property = 'attr' and prop_key = 'lock_version'
```

This could be done with a migration but I've never seen that problem, so I won't add it for now. Do you have some plugins that do things when an issue get saved?

#5 - 2009-04-02 19:45 - Brad Beattie

Nope. This only occurs when two people load up an issue and try to update it with some text at the same time.

Testing 1

#7 - 2009-04-02 19:53 - Brad Beattie

Testing 2

#8 - 2009-04-02 19:54 - Brad Beattie

Odd. Doesn't seem to occur on Redmine.org, but I'm sure it works on my system with no related plugins. Hrm.

#9 - 2009-04-09 03:15 - Eric Davis

I've seen this a lot while developing [#2621](#), so it might only occur during a stale update.

#10 - 2009-11-25 06:52 - Eric Davis

- *Status changed from Resolved to Closed*
- *Target version set to 0.9.0*
- *% Done changed from 0 to 100*
- *Affected version (unused) changed from 0.8.2 to devel*
- *Resolution set to Fixed*
- *Affected version deleted (0.8.2)*

"translation missing" errors only occur with Rails i18n so this bug is on trunk only. With [r2644](#), this should be resolved in trunk.
