Resolution:	Fixed		**Affected version:**	

Description

Journal overrides save method from ActiveRecord::Base like that

```
def save
    ...
end
```

while it should be

```
def save(perform_validation = true)
    ...
end
```

or

```
def save(*args)
    ...
end
```

With current definition, any call passing an argument to the save method - Journal#update_attribute for example - will raise an exception like this one:

```
wrong number of arguments (1 for 0)
/usr/lib/ruby/gems/1.8/gems/activerecord-2.0.2/lib/active_record/validations.rb:955:in `save'
/usr/lib/ruby/gems/1.8/gems/activerecord-2.0.2/lib/active_record/validations.rb:955:in `update_att
ribute'
<pre>
```
