<b>Description</b>	
Is it possible to have specific users show in the Assignee dropdown when creating a new ticket dependent upon which project the ticket is created in?	
It seems that if the "Issues can be assigned to this role" is checked off for a role, any users within that role shows as an assignee in every project. Am I just missing something or is that the default behavior?

No users with this role show as assignees in projects where they have the role only.
