Revision 17917 - 2019-03-03 16:18 - Go MAEDA

URLs end with "-" are rendered incorrectly in Textile (#30259).

Patch by Yuichi HARADA.

History

#1 - 2018-12-21 09:57 - Go MAEDA

- Subject changed from Last character "-" makes wrong link to URLs end with "-" are rendered incorrectly in Textile
- Description updated
- Category set to Text formatting
- Status changed from New to Confirmed

confirmed the problem. This issue is reproducible in Textile. Markdown is not affected.

Input:

`http://example.com/foo-`

Expected output:

http://example.com/foo-

Actual output:

http://example.com/foo-

#2 - 2019-01-08 09:15 - Yuichi HARADA

- *File 0001-Remove-unnecessary-trailing-white-spaces.patch added*
- *File 0002-Interpret-trailing-hyphens-as-URL.patch added*

I reviewed the regular expression to interpret the trailing hyphens as URL.
I attached patches.

#3 - 2019-01-10 14:10 - Go MAEDA

- *Target version set to Candidate for next minor release*

#4 - 2019-01-10 14:36 - Guillermo ML

- *File output.trailing.special.characters.png added*

Same with ?, &, # and \$ characters. These URL:

https://example.org/ticket.form.php?id=333?
https://example.org/ticket.form.php?id=333&
https://example.org/TicketID=455#
https://example.org/TicketID=455\$

will be rendered (3.4.4.stable) as:

output.trailing.special.characters.png

For example the second link could be generated by [glpi](#) tool and the third one is sometimes generated by [otrs](#) tool. I think all four are valid characters at the end of an URL.

#5 - 2019-02-12 16:32 - Go MAEDA

- *Target version changed from Candidate for next minor release to 4.0.2*

Setting the target version to 4.0.2.

#6 - 2019-02-20 10:25 - Go MAEDA

- *Target version changed from 4.0.2 to 4.1.0*

#7 - 2019-03-03 16:19 - Go MAEDA

- Status changed from *Confirmed* to *Closed*

- Assignee set to *Go MAEDA*

- Resolution set to *Fixed*

Committed the patch. Thank you all for reporting and fixing this issue.
