#### Description

Even with the same test, sometimes it may failure. I confirmed it with the following bash script.

```
for file in `find test -name "*.rb"`; do
  RAILS_ENV=test bundle exec rake db:reset
  bundle exec rake test TEST=$file
done
```

The tests for which the fixture was missing were the following.

Test file	Missing fixtures
test/unit/lib/redmine/field_format/version_field_format_test.rb	:enabled_modules
test/unit/custom_field_test.rb	:users
test/unit/journal_observer_test.rb	:members, :member_roles
test/unit/project_copy_test.rb	:attachments
test/unit/repository_test.rb	:user_preferences, :watchers
test/functional/calendars_controller_test.rb	:users, :email_addresses
test/functional/gannts_controller_test.rb	:email_addresses
test/functional/news_controller_test.rb	:user_preferences

I made a patch, and attach it.
