#1 - 2019-01-18 06:54 - Bernhard Rohloff

I remember this topic was also discussed in the original feature. The problem was that there can be multiple editors on a single view and the implemented accesskeys are not able to determine which editor is in focus at the moment. We would need a proper hotkey system beforehand to make this happen.

Yes, is on the to do list to implement something custom using JS.

Mizuki, do you have some working code? or you have in plan to work on this? just to know in order to not double work on this.

I have not noticed it. Thank you for the information.

I have no plans to work for the implementation of this feature.

Which should be the keyboard shortcuts here?

**#7 - 2020-10-20 13:21 - Robert Schneider**

Oh yes! It would be really helpful if this is possible again with wiki pages.

The problem was that there can be multiple editors on a single view and the implemented accesskeys are not able to determine which editor is in focus at the moment.

I don't know anything about implementation, but I would be surprised if determining the right editor is that hard. Shouldn't it be [document.activeElement](#)?

- File switch\_edit\_preview\_tabs\_using\_keyboard\_shortcuts.patch added

- Assignee deleted (Marius BĂLTEANU)

The attached patch adds `⌘/Ctrl + Shift + P` keyboard shortcut to toggle between Edit/Preview tabs. This keyboard shortcut is used by both Github and Gitlab.

I don't think that it's worth it to keep also the old shortcut (r).

Any feedback is welcome.

Thank you for sharing the patch!

I checked the operation of the patch you posted and noticed that there were cases where an exception occurred.

Reproduction procedure:

- Open preview tab with mouse click
- Try to switch from the Preview tab to the Edit tab with the shortcut key `⌘/Ctrl + Shift + P`
- "Uncaught TypeError: Cannot read property 'find' of undefined" is outputted in the developer tools console.

If `lastJstPreviewed` is undefined, I think you should use `jst`.

    jst.find('.tab-preview').click();
    lastJstPreviewed = jst
  } else {
-    lastJstPreviewed.find('.tab-edit').click();
-    lastJstPreviewed.find('textarea').focus();
+    (lastJstPreviewed || jst).find('.tab-edit').click();
+    (lastJstPreviewed || jst).find('textarea').focus();
    lastJstPreviewed = null;
  }
}
```

---

I agree with changing the shortcut keys to `⌘/Ctrl + Shift + P`.

#### #13 - 2021-01-02 21:59 - Marius BĂLTEANU

- File `0001-Add-keyboard-shortcut-to-toggle-between-Edit-Preview.patch` added
- Assignee deleted (Marius BĂLTEANU)
- Target version set to 4.2.0

Thanks Mizuki for testing the patch and for reporting the issue found.

The patch was made only for testing purposes and to validate the new shortcut. Please find attached a new version of the patch which is ready from my point of view.

Keyboard shortcuts implemented:

- `Ctrl + Shift + P`
- `Command + Shift + P`

I've tested this on the following browsers and it works as expected:

- Chrome (osx)
- Safari (osx)
- Firefox (osx)
- Edge (windows)

Let's discuss this for [4.2.0](#).

#### #14 - 2021-01-02 22:24 - Marius BĂLTEANU

- File deleted (`0001-Add-keyboard-shortcut-to-toggle-between-Edit-Preview.patch`)

#### #15 - 2021-01-02 22:25 - Marius BĂLTEANU

- File `0001-Add-keyboard-shortcut-to-toggle-between-Edit-Preview.patch` added

Just a small change to lowercase the key.

#### #16 - 2021-01-02 22:25 - Marius BĂLTEANU

- File deleted (`0001-Add-keyboard-shortcut-to-toggle-between-Edit-Preview.patch`)

- File `0001-Add-keyboard-shortcut-to-toggle-between-Edit-Preview.patch` added

#### #18 - 2021-01-06 06:32 - Mizuki ISHIKAWA

I tried running a new patch. Looks good.

Tested environment:

- Chrome Beta (MacOS Big Sur)
- IE11 in Virtualbox Windows8

Structurally, I think it's good because it works only when there is a jstoolbar.

#### #19 - 2021-01-06 22:06 - Marius BĂLTEANU

- File 0002-Adding-system-tests.patch added

Adding system tests for this feature.

#### #20 - 2021-01-06 23:17 - Marius BĂLTEANU

- Blocks Feature #34549: Add keyboard shortcuts for wiki toolbar buttons added

#### #21 - 2021-01-07 06:44 - Go MAEDA

- Status changed from New to Closed
- Assignee set to Go MAEDA
- Resolution set to Fixed

Committed the patch. Thank you for your contribution.

#### #22 - 2021-02-04 05:38 - Go MAEDA

- Subject changed from Switch edit/preview tabs with keybord shortcuts to Switch edit/preview tabs with keyboard shortcuts

#### #23 - 2021-11-02 22:09 - Jonathan Cormier

Tried this with Firefox 93.0 Linux, and ctrl-shift-p opens Firefox's private browsing. ctrl-shift-p does work fine in chrome.

Does anyone else have this issue?

Yes, I observe the issue as well (Firefox on Linux). Note however that you can also use Shift+Meta+P which with proper keyboard layout configuration [can be the same](#) as Shift+Win+P.
