Redmine - Feature #3050

Deleted files should be displayed with strike-through on the history note in which they were added

Description

If you add a file and later delete it, you will have a history item showing that the file was added and then later another history item showing that the file was deleted.

The history item in which the file was deleted shows the filename with a strike-through style, but the previous add entry shows the file without the strike-through.

It would be clearer to show the add entry with a strike-through once it has been deleted.

- File fix-journal-details-on-attachments.patch added

I have a patch for this.

Attaching a file to an issue (either from web or by mail) wouldn't create a journal detail entry, while removing will do that. The patch fixes that by adding journal details for attached files.

Forgot to add, that's a patch against 1.2 branch.

#4 - 2011-08-09 10:24 - Alex Shulgin

- File fix-receiving-new-issues-with-attachments.patch added

My first patch introduced a bug: receiving new (as opposed to updates) issues with attachments would fail with internal server error. Attached patch fixes this problem.
