

Redmine - Defect #3089

Text formatting sometimes breaks when combined

2009-04-01 06:31 - Anonymous

Status: Closed	Start date: 2009-04-01
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: UI	Estimated time: 0.00 hour
Target version: 1.0.0 (RC)	Affected version: 0.8.2
Resolution: Fixed	

Description

When you combine some text formatting it doesn't always work:

this should be bold inside italic

this should be bold inside underline

~~**this should be bold inside deleted**~~

this should be bold inside inline code

this should be italic inside bold (works)

this should be italic inside underline

~~*this should be italic inside deleted*~~ (works)

this should be italic inside inline code

this should be underlined inside bold (works)

this should be underlined inside italics (works)

~~**this should be underlined inside deleted**~~ (works)

-this should be underline inside inline code-

~~**this should be deleted inside bold**~~

~~*this should be deleted inside italic*~~

~~this should be deleted inside underline~~

-this should be deleted inside inline code-

this should be inline code inside bold (works)

@*this should be inline code inside italic*@

this should be inline code inside underline (works)

~~this should be inline code inside deleted~~ (works)

I don't think anything needs to be changed for "inline code" because of its purpose, but it would be nice if the others could be freely combined.
