

Redmine - Defect #31074

TimelogTest#test_default_query_setting fails depending on the language of the browser

2019-03-21 03:58 - Go MAEDA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Code cleanup/refactoring	Estimated time:	0.00 hour
Target version:	4.1.0	Affected version:	
Resolution:	Fixed		
Description			
The test fails in some environment.			
Failure:			
TimelogTest#test_default_query_setting [/Users/maeda/redmines/redmine-trunk/test/system/timelog_test.rb:82]:			
Expected false to be truthy.			
bin/rails test test/system/timelog_test.rb:77			
This is because the test expects the current language is always English, but actually the language is auto-selected depending on the test environment. For example, Japanese is the default language in my environment. The test looks for a table header "Comment" and fails because there is a Japanese text "コメント" instead of "Comment".

Revision 18032 - 2019-04-01 07:40 - Go MAEDA

TimelogTest#test_default_query_setting fails depending on the language of the browser (#31074).

Patch by Go MAEDA.

History

#1 - 2019-03-31 07:32 - Go MAEDA

- Target version set to 4.1.0

Forcing the English language for anonymous users fixes the issue.
