

Redmine - Defect #3127

mailto: links not parsed properly in wiki markup

2009-04-06 12:15 - Marc Liyanage

Status:	Closed	Start date:	2009-04-06
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	0.8.4	Affected version:	0.8.3
Resolution:	Fixed		
<b>Description</b>			
I wanted to use the following in our redmine's welcome text:			
<pre>... please contact the "system administrator":mailto:sysadmin@example.com?subject=redmine%20permissions ...</pre>			
This doesn't work, "system administrator" is not turned into a mailto: link as expected. It does work with an <a href="#">http:// URL</a> .			
I also tried it in a wiki page and it's the same there.			
I <b>think</b> that this used to work. I'm pretty sure I put that text in when we originally installed redmine, and it worked as expected then, so this might be a regression.			

Associated revisions

Revision 2664 - 2009-04-07 19:35 - Jean-Philippe Lang

Allow textile mailto links (#3127).

Revision 2665 - 2009-04-07 19:38 - Jean-Philippe Lang

Add test for r2664 (#3127).

History

#1 - 2009-04-06 17:42 - Anonymous

Just noticed this as well.

It definitely *did* work correctly in the past.

#2 - 2009-04-06 21:10 - Marc Liyanage

I should mention that I updated from 0.8.0 directly to 0.8.3 so it could have been introduced anywhere in between, unless others can confirm that it worked in 0.8.1 or 0.8.2.

#3 - 2009-04-07 19:37 - Jean-Philippe Lang

- Status changed from New to Resolved
- Target version set to 0.8.4
- Resolution set to Fixed

Fixed in [r2664](#).

I didn't try this kind of link before but it could have worked. Maybe it was broken by some refactoring that was done to prevent XSS attacks. A test is now included ([r2665](#)) so that it doesn't break in the future.

#4 - 2009-04-24 18:06 - Jean-Philippe Lang

- Status changed from Resolved to Closed

Merged in 0.8-stable in [r2681](#).
