Redmine - Patch #31324

Allow to set is_private flag through a keyword in emails

2019-05-08 10:51 - Jens Krämer

Status:	Closed	**Start date:**	
Priority:	Normal	**Due date:**

Category:	Email receiving	**Estimated time:**	0.00 hour
Target version:	4.1.0		

Description

Currently it is impossible to set the is_private flag of an issue with an email keyword. The attached patch developed for Planio changes that.

The code will recognize yes/no values according to the users' and the default locale, as well as 0/1.

Thank you for posting the patch. But the test fails.

```
Failure:
MailHandlerTest#test_add_issue_with_private_keyword [test/unit/mail_handler_test.rb:507]:
Expected false to be truthy.

bin/rails test test/unit/mail_handler_test.rb:499
```

I found the following line in log/test.log.

```
MailHandler: missing information from John Smith: Unable to determine target project
```

#2 - 2019-05-08 14:25 - Jens Krämer

My bad I admit I just ran the test against 3.4 (where it passed). I'll fix that tomorrow.

#3 - 2019-05-09 06:18 - Jens Krämer

- File 0001-allows-setting-the-private-flag-via-mail-keyword.patch added

here's the fixed patch - the test email was still tailored to Planio's customized mail handler which is why it failed on vanilla Redmine.

#4 - 2019-05-09 06:50 - Go MAEDA

- Status changed from Needs feedback to New

- Assignee deleted (Jens Krämer)

- Target version set to Candidate for next major release

The patch passed the test. Thanks!
