Target version:			
Resolution:			
Description I am using Redmine as an issue manager. So, I need some issue graphics like closed vs opened and others like (opened vs resolved vs closed...).			
Example: https://www.adventuresinoss.com/2016/01/19/avoiding-the-sad-graph-of-software-death/			
After many many research, I found only a deprecated module: https://www.redmine.org/boards/3/topics/4510			
Is there a way to have this feature? Is this feature will be coded in future version?

It would be really wonderful if in each project, a box displays that graphics.
