Description	
When we hurry a release of a specific version, it is natural to want to know who stops the release. To resolve the such case, I think that the attached patch is useful.

- Duplicates Patch #28510: Show issue assignee gravatar in roadmap and version page added

#2 - 2019-07-18 17:07 - Marius BALTEANU

- Status changed from New to Closed

Implemented in #28510 for the upcoming version:"4.1.0".

Please reopen if something is missing.

#3 - 2019-07-18 17:28 - Masatoshi TSUCHIYA

- File Screenshot-redmine.png added

- Status changed from Closed to Reopened

I have just checked #28510.

I think that #28510 adds issue assignee gravatars, but also think that it does not cover the developers who have no gravatars, isn't it?

If I understand #28510 properly, my patch is still useful for the case that issue assignees who have no gravatars, as shown in my attached screenshot.

+1

The Roadmap screen should briefly display the information needed to close the issue.

There are many environments that do not use Avator.

I do not use Avator at my work place.

However, the same screen can be easily realized by using the custom query function.
