Target version:			
Resolution:		**Affected version:**	

Description

In my deployed Redmine, I tried to create a news with more than 65536 characters. And I got this as attached. There should be a constraint in new.rb, such as:

`validates_length_of :description, maximum: 65535`

even more, in the news/_form.html,

`maxlength => 65535`

should be added to the textarea. I have attached the patch.
