

Redmine - Patch #32037

Constrain sidebar width on different resolutions

2019-09-08 18:02 - Anonymous

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee: Go MAEDA	% Done: 0%
Category: UI	Estimated time: 0.00 hour
Target version: 4.1.0	
Description	
<p>Currently sidebar's width is set to 22% which is not properly constrained, so I will become really huge on wider displays even though there is no need. I made a patch with multi-resolution rules to set sidebar's width depending on different resolution widths, but it's not perfect yet.</p> <p>If you have any ideas on which resolutions to add or how else to constrain it properly, please add your ideas or versions of your patch.</p>

I would like to add widths for 960px and 1152px as follows. What do you think? I usually use the web browser around 1024px to 1100px wide. The sidebar width set by attachment:responsive-multiresolution-sidebar.patch is wider than the current default theme and too wide for me.
