<b>Target version:</b> 4.2.0	
<b>Description</b>	
In #31921 was added proper support for 4 byte characters (emoji) for new installations with MySQL as database.  I proposed to have a test for this case, but we're worried that the test will broke the CI server.  The scope of this ticket is to fix the CI server if the MySQL is not already configured properly by recreating the database with utf8mb4 encoding.

Revision 20780 - 2021-03-13 02:16 - Go MAEDA

Add test for 4 byte characters (emoji) support (#32054).

Patch by Marius BALTEANU.

#### History

**#1 - 2019-09-12 23:54 - Marius BALTEANU**

- Related to Feature #31921: Changes to properly support 4 byte characters (emoji) when database is MySQL added

**#2 - 2019-09-27 17:36 - Marius BALTEANU**

- Target version changed from 4.1.0 to 4.2.0

**#3 - 2020-04-15 19:22 - Toshi MARUYAMA**

I have already added Emoji test (r19699).

git\_urf8 test repository is not extracted due to this.

I think we can avoid errors occurring on the CI server by adding the following check at the beginning of the test.

```
skip if Redmine::Database.mysql? && !is_mysql_utf8mb4
```

I will commit attachment:test\_for\_emoji\_support-v2.patch soon.

#### #5 - 2021-03-13 02:16 - Go MAEDA

- Status changed from New to Closed

- Assignee set to Go MAEDA

Committed the patch. Thank you.
