Redmine - Patch #32099

Fix inconsistent gap sizes on My page

2019-09-20 18:08 - Anonymous

Status:	New	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:	Jean-Philippe Lang	**% Done:**	0%
Category:	UI	**Estimated time:**	0.00 hour
Target version:	Candidate for next major release		

Description

Very small patch, but fixes gaps on my page to be the same.

I tried the patch but could not find the difference. Could you describe what the patch improves?

#2 - 2019-09-22 05:57 - Anonymous

- File unpatchedgaps.png added

- File unpatchedgaps2.png added

Current trunk without this patch will have 3 kinds of differently sized gaps between blocks on My page

unpatchedgaps.png
In addition while dragging blocks, there will even be some gaps between dashed borders and blocks.

Watched issues (2)

The patch reduces all the gaps to the size of that one **vertical** gap marked on <u>the first image</u> and removes gaps between dashed border and blocks on <u>the second image</u> then makes sure no big unnecessary gaps will happen between class **.splitcontenttop** and **.splitcontentleft + .splitcontentright** under it.

What is improved: more available vertical space to potentially fit more containers.

#3 - 2019-09-23 04:08 - Go MAEDA

- Assignee set to Jean-Philippe Lang

- Target version set to Candidate for next major release

Thank you for the explanation.

The current style may be an intended one, so I am assigning this issue to JPL.
