#### Description

Hi,  
Where can I find some plugin which convert files ods (LibreOffice) or xls (Microsoft Office) to redmine table?

For now, I and my friends are using my own tool (<https://www.s2rc.mischczyk.dev>) but it is very old (about 4 years) and built-in option or plugin would be much better.

Currently my tool only supports:

- Calculating formulas ( for example: "=sum(A7:K17)" )
- Merged cells
- Bold font
- Italic font
- Font color
- Background color
- Text aligning (left/center/right)

I would be nice if built-in option or plugin create the same output or better.

Output from my tool using xls file (converted from ods file in LibreOffice) :

Komórki scalone poziomo														
1		2		3		<= suma A2 + C2	email	test	I2	J2	Komórki scalone pionowo			
A3	B3	D3		cyfry		Warka	F4	H4	napis	maska
