Description

You can apply existing custom queries to Calendar but you cannot create, edit, or delete custom queries on the Calendar page because the page lacks "Save", "Edit", or "Delete" buttons for queries.

Like Issues and Gantt, the Calendar page should also have those buttons.

I attach a patch to add "Save", "Edit" and "Delete" buttons(0001~).

The 0002 patch corrects the indentation of corrects app/views/queries/_form.html.erb.
Since the buttons are only added by the 0001 patch, it is not mandatory to commit the 0002 patch.

This patch conflicts with [#23980](). I don't commit this patch now in order to prioritize [#23980]().

I think the patches conflicts with [#29482]() and not with [#23980](). Right now, only the first patch can be applied cleanly on the current trunk.
