It can be fixed with the following patch. The appropriate padding value defined in the default theme is used by removing the padding definition from Alternate theme.

I don't think it is necessary to keep the style "border: 1px solid #d7d7d7;" too. A very similar style (border:1px solid #ccc;) is already defined in public/stylesheets/application.css (see [source:trunk/public/stylesheets/application.css@18587#L467](#)

I retract my opinion in [#32206#note-2](#). Since #d7d7d7 is used in many elements in Alternate theme, border-color should be kept for the consistency of the appearance.
