

Redmine - Defect #32246

[Redmine API] functionality to export whole wiki

2019-10-13 22:01 - Wurzel mann

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
I'm trying to export my whole wiki via the Redmine API, but the export whole wiki function as seen in the bottom right-hand corner when sorting by index is not working.			
It is possible to export single pages via the API, but not the whole wiki, but I'd be really great to be able to backup the wiki this way in an automated fashion.

Hello there!

I've bumped into the same issue and with this simple patch I was able to make it work. It's super trivial and I hope it gets fixed on the next release. This was done in Redmine 4.2.10:

```
--- old/app/controllers/wiki_controller.rb      2023-03-05 21:35:09.000000000 +0000
+++ new/app/controllers/wiki_controller.rb      2023-08-18 15:08:22.053444624 +0000

Sorry for my late reply, it works, thank you very much!

#3 - 2024-02-02 11:17 - Adi Kriegisch

Great! What would it take to get this patch upstream? This only exposes the export endpoint of the wiki to API auth... Is there a reason, wiki export isn't exposed to the API?
