Italian translation update (#32326).

Patch by pasquale [:dedalus].

History

#1 - 2019-10-23 16:00 - pasquale [:dedalus]

- File 001-it-locale-v0.2.diff added

Adds to previous patch:

- remove trailing whitespaces from my previous patch;
- adds missing string label_show_closed_projects that is missing in config\locale\it.yml in redmine 4.0.5

The new patch attached is a replacement of the previous one (the previous one is now obsolete)

#2 - 2019-10-24 02:14 - Go MAEDA

Thank you for working hard on updating it.yml.

- Do you have a translation file without reordering? Reordering makes it difficult to compare the current and the new translation
- Could you split the patch into a missing translations patch and a changing existing translation patch? I will commit a patch for missing translations quickly but would not commit changes to existing translation because I don't understand Italian and I cannot judge the changes are appropriate

#3 - 2019-10-24 18:16 - pasquale [:dedalus]

are appropriate

Here a new set of patches that are a replacement of previous ones:

- [002-01-adds-missing-translations.diff](#) adds some missing translation
- attachment:002-02-adds missing key-for-label_show_closed_project.diff adds missing key (and related it string) label_show_closed_project tha was missing in it.yml and it is present in en.yml;
- [002-03-fix-some-string-capitalization.diff](#) fix some capitalizations issue between en.yml and it.yml;
- [002-04-fix-incomplete-translation-for-notice_successful-keys.diff](#) fix incomplete text for 4 notice_successful items;
  [002-05-cumulative-patch-to-fix-existing-translations.diff](#) changes some strings already existing in previous redmine locale version.

Thanks in advance.

Thank you for splitting the patch. It is really helpful for me.

I looked [002-01-adds-missing-translations.diff](#) and found that the translation for label_relations is "Relationi", but other existing translation for "relation" is "Relazioni". Is "Relationi" correct?

```
label_relations: Relationi
```

No, sorry it is a typo error: the right word Is "Relazioni"

Hi Go MAEDA, thanks for reviewing my patches.
Maybe a clarification is needed: the patchattachment:"002-02-adds missing key-for-label_show_closed_project.diff" fix an issue on the official it.yml file where the line related at the key label_show_closed_project is missing, so the string "View closed projects" cannot be translate at all.
Thanks!

The latest trunk no longer uses label_show_closed_project, so the key has been removed in [r18785](#) ([#29482](#)).

Hello pasquale [:dedalus], your translation patch ([002-05-cumulative-patch-to-fix-existing-translations.diff](#)) changes the Italian words "notizia" and "sottoattività" to English word "news" and "subtask". Could you clarify the reason?

For *news* instead of literal translation *notizia*, because in current language the english word is used and the literal translation is used rarely (xref http://www.treccani.it/vocabolario/news/)
For *subtask* instead of literal translation *sottoattività*, because I believe that the english term is more appropriate in a agile context because in current language we refer to task\subtask and not to attività\sottoattività (xref http://www.treccani.it/vocabolario/task/)
