

Redmine - Defect #3233

Wrong version in trunk

2009-04-23 22:25 - Stefan Verstege

| Resolution: Fixed | |
| Description | |
| I use the trunk of Redmine but it looks like the version is not oke (0.8.0.devel.2679) instead of : 0.8.3.devel.2679. Thanks to this several plugins (redmine-graph i.e.) don't work. | |

Revision 2802 - 2009-07-04 14:17 - Jean-Philippe Lang

Set trunk version to latest stable release (#3233).

History

#1 - 2009-04-24 00:43 - Eric Davis

Yes, the version numbers are getting changed in the specific branches so trunk is still at 0.8.0. Jean-Philippe, should the release process bump the version number in trunk before merging the changes to the release branch?

#2 - 2009-04-24 17:41 - Jean-Philippe Lang

The version number in trunk should be fixed indeed.

But I'm not sure it should be the same as the last release number. Currently, trunk is much different than the 0.8.3 release. Should we set something else like 0.8.9.devel or even 0.9.0.devel ?

#3 - 2009-04-24 20:20 - Stefan Verstege

anything other than 0.8.0 works for me :D

Perhaps it's a good idea to give it the versionnumber of the first next version on the roadmap?

I'd say to use the current stable version (0.8.3 now) since it includes the 'devel' BRANCH. Then a plugin could require `redmine :version_or_higher => '0.8.3'` to want 0.8.3 or trunk.

Agree.. Any idea when this will be fixed?? Since this is now also reported in the issuetrackers of some plugins (like [http://github.com/mszczytowski/redmine_charts/issues#issue/61])

#6 - 2009-07-02 14:32 - Łukasz Rżanek

Normally I would suggest, that the trunk is always high with numbers, i.e.:

- Last released version: 0.8.3.[1..8].x - usually you won't go further than 3-5
- Last development version: 0.8.3.9.x

This works for me event in the most complex projects, so it should work here as well...

#7 - 2009-07-04 14:16 - Jean-Philippe Lang

- *Status changed from New to Closed*
- *Resolution set to Fixed*

Fixed in r2802. Trunk version is now set as the latest stable version.
