

Redmine - Patch #32461

Allow Redmine:MyPage to be overridden in plugins

2019-11-13 00:16 - Jérôme BATAILLE

Status:	New	Start date:	
Priority:	Normal	Due date:

Target version:			
Description			
Hi,			
In the UserPreference model, Redmine:MyPage is required like this :			
<pre>require 'redmine/my_page'</pre>			
It will be very helpful to be able to override methods of this module , for that require_dependency is necessary, if not overrides are not taken in account.			
<pre>require_dependency 'redmine/my_page'</pre>			
This blocks a plugin I try to publish : http://www.redmine.org/issues/31224			
Thanks a lot.

Hi, this small change is mainly necessary for development mode.
