Target version:			
Description		·	
Hi,			
In the UserPrefere	ence model, Redmine:MyPa	ge is required like this :	
require 'redm	ine/my_page'		
It will be very help not taken in accou		thods of this module , for that require_dep	pendency is necessary, if not overrides are
require_depen	dency 'redmine/my_pag	ie ,	
This blocks a plugin I try to publish : <u>http://www.redmine.org/issues/31224</u>			
Thanks a lot.
