| Description | |
| <p>Maybe it can be done already and i just could read the docs, but it would be really nice to also set the progress of a ticket via commit message.</p> <p>We can change the status of a ticket and record the time</p> <p>E.G. a commit message like bugfix xxxyyy refs #234 @2h %70</p> <p>This would associate the commit with the ticket 234, add 2h of used time and sets the progress of the ticket to 70%</p> | |
