

Redmine - Defect #32793

Email address with Punycode top-level domain is not accepted

2020-01-13 06:28 - Go MAEDA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:	4.1.1	Affected version:	
Resolution:	Fixed		
Description Redmine does not accept email addresses that have Punycode top-level domain such as " jsmith@example.xn--80akhbyknj4f " (example.ИСПЫТАНИЕ). There are already over 150 TLDs that begin with "xn--" in the real world (see https://www.icann.org/resources/pages/tlds-2012-02-25-en), so Redmine should accept those domains. The attached relaxes the validation rule for an email address to accept top-level domains which begin with "xn--".

Associated revisions

Revision 19660 - 2020-04-05 11:55 - Jean-Philippe Lang

Email address with Punycode top-level domain is not accepted (#32793).

Patch by Go MAEDA.

Revision 19661 - 2020-04-05 12:00 - Jean-Philippe Lang

Adds a test for r19660 (#32793).

Revision 19667 - 2020-04-05 13:23 - Jean-Philippe Lang

Merged r19660 and r19661 to 4.1-stable (#32793).

History

#1 - 2020-01-13 06:29 - Go MAEDA

The issue can be fixed if the regular expression is changed as follows:

```
diff --git a/app/models/email_address.rb b/app/models/email_address.rb
index 46bca384a..dd0b30607 100644
--- a/app/models/email_address.rb
+++ b/app/models/email_address.rb
