

Redmine - Patch #32951

Issue Statuses sortable by name and position

2020-02-04 21:14 - Anas Al Salah

Status: New	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Administration	Estimated time: 0.00 hour
Target version:	
Description	
Allow admin to sort statuses by name and position in /issue_statuses	

History

#1 - 2020-02-04 21:15 - Anas Al Salah

Redmine version: 3.4.6.stable

#2 - 2020-02-05 00:40 - Go MAEDA

- *File screenshot-with-patch-applied@2x.png added*

Thank you for posting the patch. However, I would like to point out the following points:

- Showing position numbers is not very good looking and inconsistent with other pages such as trackers and roles
- The patch makes the behavior of existing sort handle unpredictable (at least for me)
- The patch cannot be applied cleanly to the current trunk

Thanks for your feedback, Go MAEDA

- *Showing position numbers is not very good looking and inconsistent with other pages such as trackers and roles*

At our organization we have 100+ statuses for 20+ trackers, so it's important to sort statuses alphabetically when needed.

- *The patch makes the behavior of existing sort handle unpredictable (at least for me)*

It still sorts by the row position you drag it to, but yes, it's confusing. I wasn't able to come up with a good solution for that.

- *The patch cannot be applied cleanly to the current trunk*

Sorry! I should upgrade our Redmine to the latest version.
