<b>Resolution:</b>			
<b>Description</b>			
<p>In app/models/user.rb line 790, notify_about?(object) is defined. In app/models/issue.rb line 1037 notified_users method's comment explains</p> <pre># Author and assignee are always notified unless they have been # locked or don't want to be notified</pre> <p>My question is, should User.notify_about?(issue) check the passed issue being watched by the user or not? If it should, I would like to know whether notify_about?(object) can take into account the issue being watched or not according to the user's notification preferences?</p> <p>Kind attention will be appreciated.</p>
