<b>Description</b>																			
<p>"Successful deletion" flash message is not displayed after deleting some types of objects such as issues, documents, and wiki pages. However, you will see the message after deleting time entries or messages.</p> <p>I think the message should be displayed when deleting any type of content for consistency and usability.</p>

Fix that "Successful deletion" notice is not displayed after deleting some types of content (#33116).

Patch by Yuichi HARADA.

The following patch will display a "Successful deletion" flash message after deleting issues, documents, news, and wiki pages.

I think that you don't need to display a flash message because the attachments disappear dynamically on the screen when you delete them.
