Redmine - Defect #33186

field_activity should be used rather than label_activity in the context of time tracking

2020-03-23 15:41 - Go MAEDA

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Go MAEDA		**% Done:**	0%
Category:	I18n		**Estimated time:**	0.00 hour
Target version:	4.2.0			
Resolution:	Fixed		**Affected version:**	

Description

Redmine has two i18n labels for the word "Activity", label_activity and field_activity. Of them, field_activity is used in the context of time tracking.

However, in some places, label_activity is incorrectly used in the context of time tracking. This causes inconsistent screen display such as Japanese, Korean, Russian because those languages assigns different translations for label_activity and field_activity as follows:

```
$ egrep '(label|field)_activity' config/locales/ja.yml
  field_activity: 作業分類
  label_activity: 活動
$ egrep '(label|field)_activity' config/locales/ko.yml
  field_activity: 작업종류
  label_activity: 프로젝트
$ egrep '(label|field)_activity' config/locales/ru.yml
  field_activity: Деятельность
  label_activity: Действия
```

The attached patch replaces label_activity used in the context of the time tracking with field_activity.
