Target version:	
Resolution: Duplicate	
Description	
<p>We really like a gauge that displays status of tickets per version.</p> <p>Not all systems have versions, not all tickets are assigned a version.</p> <p>If: there are multiple versions in a project show one extra bar (?last or first?) for all tickets without version</p> <p>If: there are no versions in a project show roadmap like bar on project overview</p> <p>A visual bar of project completion is a great project status indicator. Not seeing it when there is no version (per project or on a ticket) makes harder to know how much work in project is left.</p>

Duplicate of issue #1869. I think only the visual bar feature for projects/tickets(?) etc. is something new (check the available plugins to see if there's something which fits your needs already or open a new issue for the idea). Can you confirm?

Resolved the issue for now...

Regards,

Mischa.
