Target version:	4.1.2		

Description

Hello

I would like to complete the test suite, and add a test about the creation of ProjectCustomFields.

Currently, the functional tests only relate to IssueCustomFields.

Thank you

```
diff --git a/test/functional/custom_fields_controller_test.rb b/test/functional/custom_fields_controller_test.rb
index 7f41888ff..8b5e33155 100644
```

```
--- a/test/functional/custom_fields_controller_test.rb
+++ b/test/functional/custom_fields_controller_test.rb
```

```
@@@ -303,6 +303,29 @@@ class CustomFieldsControllerTest < Redmine::ControllerTest
  assert_equal 1, field.trackers.size
end
```

```
+ def test_create_project_custom_field
+   field = new_record(ProjectCustomField) do
+     post :create, :params => {
+       :type => "ProjectCustomField",
+       :custom_field => {
+         :field_format => "string",
+         :name => "test_new_project_custom_field",
+         :description => "",
+         :min_length => "",
+         :max_length => "",
+         :regexp => "",
+         :text_formatting => "",
+         :default_value => "",
+         :url_pattern => "",
+         :is_filter => "0",
+         :is_required => "0"
+       }
+     }
+   end
+   assert_redirected_to "/custom_fields/#{field.id}/edit"
+   assert_equal "test_new_project_custom_field", field.name
+ end
+
+ def test_create_with_project_ids
+   assert_difference 'CustomField.count' do
+     post :create, :params => {
```
