

## Redmine - Defect #33270

### Failed database migration when upgrading to version 4.1.1

2020-04-07 15:10 - Ivan Cenov

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Rails support	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	4.1.1
<b>Resolution:</b>	Invalid		

#### Description

While upgrading to Redmine 4.1.1 I encountered following problem:

```
E:\data\redmine>bundle exec rake db:migrate RAILS_ENV=production
rake aborted!
ArgumentError: Missing `secret_key_base` for 'production' environment, set this string with `rails
  credentials:edit`
E:/data/redmine/config/environment.rb:16:in `'
Tasks: TOP => db:migrate => db:load_config => environment
(See full trace by running task with --trace)
```

StackOverflow has following thread about this problem :

<https://stackoverflow.com/questions/51466887/rails-how-to-fix-missing-secret-key-base-for-production-environment>

Note, that bundle install upgraded rails to version 5.2.4.2.

I suppose that something has to be done in Redmine, I don't know what exactly. Should this be done on upgrading stage or it has to be added in Redmine and downloaded with the Redmine zip archive?

#### History

##### #1 - 2020-04-07 16:06 - Ivan Cenov

- Status changed from New to Resolved

The problem was solved. I forgot to execute

```
bundle exec rake generate_secret_token
```

Please close this issue.

##### #2 - 2020-04-07 16:18 - Marius BĂLTEANU

- Status changed from Resolved to Closed

- Resolution set to Invalid
