Hey Marius,

Thank you for reply.

Please find below details regarding the issue:

- 1) Ruby Version - 2.5.3
- 2) Rails Version - 5.2.2.1

Steps to reproduce the issue:

- 1) Install blank redmine ova (preferably any 4.0 version)
- 2) After successful installation Create Demo/Sample project
- 3) In that project create new issue and attach files to that issue
- 4) Now if you go to the issue and check the files section - on hovering over attached file you can see the link to download the attached file.
- 5) Now if you go to the issues tab and from options add the column named file you can see the attachments in that column.
- 6) If you hover over that attachments you will be able to see that the link is breaking in half.

I am attaching the files for your reference for better understanding.

For some reason I am not able to assign this issue to you,

If you are seeing this, Please check and help.

Thanks!

FWIW: This also seems to be the subject of the [No Attachements after update 2.5.0 -> 4.0.4](#) forum thread.

I don't understand what does "the link is breaking in half" and what is broken. If you click the link, you will see the preview page of the attachment. Are you saying that the preview page doesn't show up when you click on the link?

Thanks, but I think my problem in the thread is different. I can download attachements and I can't see them in the attachement viewer because the path contains `/redmine/redmine/` and it should be `/redmine/`

I don't understand what does "the link is breaking in half" and what is broken. If you click the link, you will see the preview page of the attachment. Are you saying that the preview page doesn't show up when you click on the link?

Problem is the link is being displayed as `/redmine/attachments/id` instead of `/redmine/attachments/id/filename`.
To preview the file using magnifying icon file link should be `/redmine/attachments/id/filename` as the link is upto id field only file preview is throwing error as "The requested content can not be loaded".

#7 - 2020-08-16 22:41 - Sarthak Bakshi

Nevermind I got the solution!
