Resolution: Duplicate	
Description When browsing a selection of issues (bug review for example), user must go back to issues list in order to select the next issue. This is not optimal, and some issues may be forgotten. I remember that in Flyspray a button "Next" and "Previous" are available on the form issue in order to jump directly to the next (resp. previous) issue. Could this be implemented in redmine ? PS: This is the same idea of the button "Create and continue" of the "New issue" form

First & Last buttons will also be good :)

#2 - 2009-05-12 18:51 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Duplicate

Same as #2850.
