Description			
<p>The attached patch updates Tribute, a JavaScript library used for inline issue auto-complete (#31989), from 3.7.3 to 5.1.3.</p> <p>One of the most interesting features of the latest Tribute is multiple trigger characters added in Tribute 4.1.1. I think we can add several nice features to Redmine by making use of it, for example, auto-complete for <code>[[RedmineTextFormattingTextile#Macros wiki macros]]</code> that can be invoked by typing "{".</p>
