<b>Target version:</b>	4.2.0		

#### Description

The attached patch updates Tribute, a JavaScript library used for inline issue auto-complete (#31989), from 3.7.3 to 5.1.3.

One of the most interesting features of the latest Tribute is multiple trigger characters added in Tribute [4.1.1](#). I think we can add several nice features to Redmine by making use of it, for example, auto-complete for `[[RedmineTextFormattingTextile#Macros|wiki macros]]` that can be invoked by typing "{".
