<b>Description</b>	
<p>It would be useful to get users be able to view all (or some) administration settings: practically giving read-only access to the administration menu.</p> <p>A simple solution for that would be a single right that gives full view of it.</p> <p>A more granulated solution would introduce a new right category with many right under it, likes:</p> <ul style="list-style-type: none"><li>• View Workflows</li><li>• View Trackers</li><li>• ...</li></ul>
