

Redmine - Feature #33486

When copying the task, I want to reflect the version change of the main task in the version of the subtask

Description	
<p>Select "Copy" of the main task and check "Copy subtasks" to copy the main and subtasks in a batch. At that time, changing the version of the main task does not change the version of the subtask to the same value. It would be nice to be able to change the version value of the subtask with the copy operation of the main task.</p> <p>Redmine version 3.4.6.stable Ruby version 2.3.3-p222 (2016-11-21) [i386-mingw32] Rails version 4.2.8</p>

It may be possible to use if you use the following Plugin

<https://github.com/edosoft/redmine-inherit-fields-plugin>

The following is for Japanese

<https://redmine.tokyo/issues/1135>

#2 - 2020-06-02 15:08 - Go MAEDA

- Target version set to Candidate for next minor release

#3 - 2020-06-02 15:09 - Go MAEDA

- Target version deleted (Candidate for next minor release)
