

Redmine - Feature #33583

Hiding fields in email notifications

2020-06-11 12:07 - Barty Kacz

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:			
Resolution:	Invalid		
Description			
I use Redmine in medical projects and I've created lot of custom fields with sensitive data. All that fields are necessary in our workflow. Is it possible to restrict content of mail notifications to for e.g. only subject from activity about issues? All fields are listed in every mail.

SOLVED

I've deleted this part from both issue_edit.text.erb and issue_add.text.erb files

```
<%= render :partial => 'issue', :formats => [:text], :locals => { :issue => @issue, :user => user user, :issue_url => @issue_url } %>
```
