

Redmine - Patch #33638

Add informative default welcome text for new installations

Description

Currently, the default value of "Welcome text" is not defined. As a result, Redmine shows a blank Home page to users who access Redmine just after installation. And some users don't know that they can put any text on the Home page by setting "Welcome text" in the Administration panel.

Those small problems can be resolved by setting a short default text to the setting.
