

Redmine - Defect #33744

REST API does not allow unassigning user

2020-07-16 13:55 - Johannes Bauer

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	4.1.1
Resolution:			
Description Hi there, assigning a different user using the JSON REST API works perfectly on 4.1.1.stable when we assign to a specific user ID. However, when trying to unassign a user, the request is simply ignored. I tried putting null, 0, -1 or "" as the user ID, but nothing works; I believe this to be a defect. Best, Johannes

History

#1 - 2020-07-29 04:19 - Yuichi HARADA

I was able to unassign the Assignee with the following REST-API command, referring to [Rest_Issues](#).

```
curl -X PUT -H "Content-Type: application/json" -H "X-Redmine-API-Key: <API KEY>" -d '{"issue": {"assigned_to_id": ""}}' http://127.0.0.1:3000/issues/1.json
```

If you can't update with the above command, it is possible that **Edit issues** permission is disabled for the user running the command.
