I think that because of the fixtures are not enough.

I cannot reproduce the problem.

```
$ RAILS_ENV=test bin/rake db:reset
$ ruby test/unit/issue_nested_set_test.rb
Run options: --seed 59495

You can reproduce it by testing as follows. I think it's because of the order in which the tests are run.

```
$ RAILS_ENV=test bundle exec rake db:migrate:reset

$ RAILS_ENV=test bundle exec rake test TESTOPTS="--seed 43474"
Run options: --seed 43474
```
